ESWARAN.S

Cybersecurity Analyst | Security Operations

Chennai, India | eswaransk06@gmail.com | linkedin.com/in/eswarans06 | github.com/EswaranS-06 | Portfolio

PROFESSIONAL SUMMARY

Cybersecurity graduate with hands-on experience in **security monitoring, SIEM, endpoint security, log analysis, incident triage, and security compliance**. Currently working as a Cybersecurity Analyst Intern with practical experience using **Wazuh for security monitoring and supporting DPDP Act compliance activities**. Experienced with SOC operations, network security, IAM fundamentals, and security testing through previous training, certifications, and hands-on projects.

EXPERIENCE

Cybersecurity Analyst Intern | *Xyberu — Chennai, India*

August 2026 – Present

- Monitor endpoint security events using **Wazuh** and review centralized security telemetry to identify potentially suspicious activity.
- Investigate **Wazuh alerts and security events**, analyzing event details to support security monitoring and incident investigation.
- Work with endpoint security monitoring workflows involving **log collection, event analysis, and alert investigation**.
- Support DPDP Act (DPDPA) compliance and governance through compliance assessments, evidence collection, and security documentation.

Cyber Security Trainee | *HTC Global Services — Chennai, India*

June 2025 – April 2026

- Completed a **10-month structured cybersecurity training program** covering Windows/Linux administration, network protocol analysis, SIEM, incident response, and DFIR fundamentals.
- Worked with **Sumo Logic SIEM** for log collection, search queries, dashboards, security-event monitoring, and alert investigation.
- Investigated security events by correlating **Windows Event Logs, Sysmon telemetry, and Wireshark packet captures** to identify suspicious activity and support false-positive triage.
- Performed network reconnaissance and security testing using **Nmap and Metasploit**, mapping simulated attack techniques to **MITRE ATT&CK** concepts.

PROJECTS

Mini SOC Lab — Security Operations Home Lab

Wazuh | Splunk | Sysmon | Windows | Kali Linux | VMware

- Built a **3-node virtual SOC** with Windows endpoints, SIEM infrastructure, and a Kali Linux attacker environment for threat detection and incident triage.
- Collected Windows and **Sysmon telemetry** through Wazuh/Splunk and investigated simulated security events.
- Created detection rules for **SSH brute-force and suspicious process-creation** scenarios and mapped attacks to MITRE ATT&CK.
- Achieved **sub-30-second mean time to detect (MTTD)** during simulated attack scenarios.

EVIDEX — Web VAPT Document Automation Tool

Python | REST APIs | JWT | RBAC

- Developed a web application for automating VAPT report creation, management, and export workflows.
- Implemented **JWT authentication and role-based access control (RBAC)** for application users.
- Tested REST API **authentication, authorization, and access-control** mechanisms and remediated identified security misconfigurations.

AWS SOC Environment — Cloud Security Monitoring Lab

AWS | EC2 | VPC | Terraform | Splunk | Windows | Debian

- Built an AWS security-monitoring lab using **EC2, VPC networking, security groups, and multi-OS hosts**.
- Provisioned cloud infrastructure with **Terraform** and configured Splunk for security telemetry collection.
- Set up and tested **Splunk Universal Forwarder** log-shipping between Windows/Linux hosts and the SIEM environment.

TECHNICAL SKILLS

Security Operations: Wazuh, Splunk, Sumo Logic, SIEM, Security Monitoring, Log Analysis, Alert Investigation, Alert Triage, Incident Triage, IOC Identification, Threat Detection, DFIR Fundamentals, MITRE ATT&CK

Network & Endpoint Security: Network Security, TCP/IP, DNS, HTTP/HTTPS, OSI Model, Network Traffic Analysis, Windows Security Monitoring, Linux Security Monitoring, Sysmon, Windows Event Logs, Wireshark, Nmap

Vulnerability & Application Security: Vulnerability Assessment, Web VAPT, Web Application Security, API Security, Authentication & Authorization Testing, Burp Suite, Metasploit, SQLMap, Nikto, FFUF, Gobuster

IAM & Compliance: AAA, Authentication & Authorization, RBAC, Access Control Models, MFA/2FA, SSO, Zero Trust, IAM Governance, AWS IAM, DPDP Act (DPDPA), Compliance Assessment, Evidence Collection

Cloud & Scripting: AWS, EC2, VPC, Security Groups, Terraform, Linux, Windows, Python, Bash, PowerShell

EDUCATION

Bachelor of Computer Applications (BCA) — Cyber Security
Hindustan Institute of Technology & Science, Chennai
2023 – 2026 | CGPA: 9.30 / 10

Relevant Coursework: Network Security, Cryptography & Information Security, Operating System Security, Database Management Systems, Python Programming

CERTIFICATIONS

- **SOC Level 1** — TryHackMe, 2026
- **Identity and Access Management (IAM): Vendor Neutral Course** — Udemy, 2026
- **Networking Basics** — Cisco Networking Academy, 2026
- **Jr Penetration Tester** — TryHackMe, 2026

ACHIEVEMENTS

- **TCS HackQuest:** Earned an interview offer after advancing through two CTF elimination rounds.
- **PEC Capture The Flag:** Secured **5th place among 100+ participants**.
- **Cybertron CTF:** Ranked **#34 with 4,430 points** in a 30-hour Jeopardy-style CTF.
