Internship / Training Experience

HTC Global Services

Cyber Security Trainee – Cyber Security | June 2025 – April 2026

- Completed structured training in **Windows & Linux fundamentals, networking, cybersecurity principles, SIEM concepts, incident response, and Digital Forensics & Incident Response (DFIR)**.
 - Gained foundational knowledge of **Sumo Logic SIEM**, including log collection, search queries, dashboards, and basic security event monitoring through guided labs.
 - Performed introductory network traffic and log analysis using **Wireshark, Sysmon**, and Windows Event Logs to identify common security events in a controlled environment.
 - Used tools such as **Nmap** and **Metasploit** in supervised lab exercises to understand network reconnaissance, vulnerability assessment, and attack techniques from a defensive perspective.
-

Projects

Mini SOC Lab – Wazuh | Log Analysis | sysmon

- Built and configured a Wazuh-based SIEM lab using VMware with **Debian (Wazuh Server), Windows 11 (Victim), and Windows 11 (Host/Base System)**
- Simulated cyberattacks from **Kali Linux** against the Windows victim machine to generate security events and analyze logs.
- Developed and customized Wazuh detection rules to identify suspicious activities, including **SSH brute-force attacks**, and generate real-time alerts.
- Continuously expanding the lab by implementing additional attack scenarios and enhancing detection capabilities while improving SOC and threat detection skills.

[Web VAPT Document Automation Tool](#) – Python | JWT | REST APIs

- Developed a web-based automation platform to streamline **Vulnerability Assessment and Penetration Testing (VAPT)** documentation, software release management, and report exchange workflows.
 - Implemented **JWT-based authentication** and role-based access control to secure user access and document management.
 - Built features for creating, editing, exporting, and emailing VAPT reports, improving documentation efficiency and reducing manual effort.
 - Tested and validated REST API endpoints for authentication, authorization, and access control vulnerabilities, enhancing the application's security posture.
-

Skills

- **SIEM & Log Analysis:** Wazuh, Splunk(Basics), ELK Stack (Basics), Windows Event Logs, Sysmon
 - **Threat Detection & SOC:** Alert Investigation, Log Analysis, Incident Triage, IOC Identification, MITRE ATT&CK (Fundamentals)
 - **Operating Systems:** Windows, Linux (Administration & Troubleshooting)
 - **Networking:** TCP/IP, DNS, HTTP/HTTPS, OSI Model, VPN, Firewall
 - **Security Tools:** Wireshark, Burp Suite, Metasploit, Nmap, Snort
 - **Scripting & Automation:** Python (Basics), Bash, PowerShell
 - **Soft Skills:** Problem-Solving, Creativity, Adaptability, Teamwork
-

Academic Background

Bachelor of Computer Applications (BCA)

Hindustan Institute of Technology & Science | 2023 – 2026

- CGPA: 9.23 / 10 (92.3%)
- Specialization: Cyber Security
- Class Representative

Certifications

1.	SOC Level 1	TryHackMe	Jun 2026
2.	Networking Basics	Cisco NetAcad	Mar 2026
3.	Cyber Security 101	TryHackMe	Dec 2025
4.	Jr Penetration Tester Path	TryHackMe	Jan 2026
5.	Cybersecurity Fundamentals	IBM SkillsBuild	Jul 2024

Achievements

- Earned a **TCS interview offer** by advancing through 2 elimination rounds of HackQuest CTF, solving challenges in JavaScript deobfuscation, DNS-over-HTTPS traffic analysis, and API security testing.
- Secured **5th place** in the PEC Capture The Flag (CTF) competition, demonstrating strong skills in cryptography, OSINT, steganography, and reverse engineering.
- Secured **#34 Rank with 4430 points** in Cybertron CTF — a Jeopardy-style event conducted for 30 consecutive hours.

Professional Development

- Actively upskilling in **SOC Operations, SIEM, Threat Detection, and Incident Response** through hands-on labs on **TryHackMe**.
 - Completed the **SOC Level 1** learning path, gaining practical experience in **alert investigation, log analysis, IOC identification, incident triage, and MITRE ATT&CK** fundamentals.
 - Practiced log analysis and threat hunting using **Splunk** and the **ELK Stack**, including log searching, filtering, dashboard analysis, and identifying suspicious activities.
 - Continuously expanding knowledge in **Windows Event Logs, Sysmon, Wazuh, and SIEM detection engineering** by building home lab environments and solving real-world scenarios.
-
